GANNA SAFAR

DEVELOPER | FRONTEND & FULL-STACK WEB DEVELOPMENT

Cairo, Egypt | 01017982763 | gannamohammed812@gmail.com
linkedin.com/in/ganna-safar | github.com/GannaSafar

PROFESSIONAL SUMMARY

Software Engineering graduate pursuing Developer, Frontend Developer, and Full-Stack Developer opportunities. Experienced in building responsive web applications and user interfaces with React, Angular, TypeScript, HTML, CSS, and Figma, and integrating web clients with REST APIs and backend services. Knowledge of software development life cycle (SDLC), object-oriented programming, software testing, debugging, troubleshooting, and Agile development. Brings user-centered design, communication, collaboration, and problem-solving skills.

PROFESSIONAL EXPERIENCE

Software Engineer Intern | DSC Egypt

Oct 2026 – Present | Cairo, Egypt | Hybrid

- Develop full-stack applications and web applications, contributing to frontend interfaces and backend functionality.
- Build responsive web experiences and connect user interfaces with application logic, REST APIs, and data handling.
- Implement application features, test functionality, troubleshoot issues, and improve code quality and maintainability.

No-Code Development Intern | Reyada

Aug 2026 – Present | Nasr City, Cairo | Hybrid

- Build and improve business applications using no-code and low-code platforms based on business requirements.
- Design interfaces, configure workflows and business process automation, manage application data, and support API and third-party integrations.
- Test features, troubleshoot workflow and logic issues, document processes, and support deployment and continuous improvement.

Software Engineering Intern | Era Engines

Jun 2026 – Aug 2026 | Remote

- Supported software implementation, testing, debugging, documentation, maintenance, and technical issue resolution across the software development life cycle.
- Applied software design and object-oriented programming principles to create reusable code and improve software quality.
- Collaborated on feature development, technical discussions, and continuous application improvement.

Mobile Development Trainee | Ain Shams University

Jul 2025 – Aug 2025

- Completed mobile development training focused on mobile application fundamentals, interface design, and application logic.
- Practiced applying programming concepts to build app features and user-friendly mobile experiences.

Web Development Trainee | Ain Shams University

Jul 2024 – Aug 2024

- Completed web development training covering core web technologies and interactive website development.
- Practiced structuring web pages, styling responsive layouts, and implementing client-side interactions.

CS Tutor | iSchool

Jul 2023 – Nov 2023 | Part-time

- Taught computer science concepts through coding activities, helping learners develop computational thinking and problem-solving skills.

UpSkill Program Participant | ASU Career Center

Jul 2023 – Aug 2023

- Completed a professional development program delivered by ASU Career Center with iCareer, strengthening communication, presentation, networking, personal branding, and workplace etiquette.

HR Recruitment Specialist | Qsource

May 2021 – Jan 2022

- Reviewed job requirements, sourced and screened candidates through LinkedIn and social platforms, and maintained applicant tracking records.

EDUCATION

Bachelor of Computer Science (Dual Degree) | Ain Shams University & University of East London | June 2026

Major: Software Engineering | Graduation Project: Personalized Career & Learning Roadmaps for CS Students | Grade: A+

IGCSE | El Rowad College – Nasr City | June 2022

PROJECTS

PathFinder — Personalized Career & Learning Roadmaps | React, TypeScript, REST APIs, FastAPI, JWT

Designed and developed the web client for career assessment, career matching, personalized roadmaps, progress tracking, portfolio, and resume-builder screens. Integrated REST APIs and JWT authentication with the FastAPI backend.

ASU Learn — E-Learning Web Platform | Angular, TypeScript, PrimeNG, Figma

Designed responsive UI/UX in Figma and developed role-based Student, Instructor, and Admin interfaces for courses, assignments, assessments, learning materials, and progress tracking.

Employee & Department Management System | ASP.NET Core MVC, Bootstrap, AJAX, jQuery, Entity Framework Core

Built a responsive web application with employee and department create, read, update, and delete (CRUD) operations, authentication, authorization, dynamic search, and filtering.

Crime Prediction AI Model | Python

Developed a predictive model for crime-related pattern analysis, applying programming, data processing, and AI fundamentals.

Online Bookstore | Java, Object-Oriented Programming

Built a Java application using reusable classes and object-oriented software design concepts.

Self-Diagnosis System | C++

Implemented a modular C++ application using core programming and problem-solving concepts.

TECHNICAL SKILLS

Web Development: HTML5, CSS3, JavaScript, TypeScript, React.js, Angular, PrimeNG, Bootstrap, ASP.NET Core MVC, jQuery, AJAX, JSON, PHP, Responsive Web Design, .NET, Information Technology

Full-Stack & Integration: REST APIs, API Integration, FastAPI, JWT, Backend Integration, No-Code Development, Low-Code Development, Workflow Automation, Business Process Automation, Security Systems

UI/UX Design: Figma, User Interface Design, User Experience (UX), Wireframing, Prototyping, User-Centered Design

Programming: Java, Python, C++, C#, C, Object-Oriented Programming (OOP)

Software Engineering: Software Development Life Cycle (SDLC), Software Design, Software Testing, Debugging, Troubleshooting, Requirements Analysis, Agile Methodologies, Clean Code, Code Quality, Computer Engineering

Professional Skills: Communication, Collaboration, Presentation, Problem-Solving, Critical Thinking, Technical Documentation

COURSES & CREDENTIALS

- IBM SkillsBuild — Software Engineering for Web Developers Pathway (83 hours, 6 microcredentials), completed.
- IBM SkillsBuild — Web Development Fundamentals (12 hours), completed.
- Mahara-Tech (ITI) — Front-End Development Track: HTML/CSS, JavaScript, ES6+, TypeScript, React.js, and Clean Code, completed.
- Mahara-Tech (ITI) — UX Design Fundamentals, completed.
